Education

The George Washington University

Sep 2022 – May 2028 (expected)

Ph.D. in Economics

Fields: Applied microeconomics, text analysis

Seoul National University

M.A. program in Economics: all but thesis

Aug 2020

B.A. in Economics, *summa cum laude* (GPA 3.93/4.0, top 5%)

Feb 2018

Research

Trade Shocks and Media Slant [Draft] [SSRN]

Award: George and May Shiers Memorial Endowed Award, GWU (2026)

Presentations: Southern Economic Association (2026)

- Studied the causal effect of NAFTA trade shocks on the political slant of local newspapers.
- Trained NLP classifiers on U.S. congressional speeches to score the slant of 52M news articles.
- Found that newspapers in the most trade-exposed regions shifted 9.6 percentage points more toward Republican-leaning coverage, driven by papers in low-education areas that initially leaned Democratic.

In and Out: How Do Food Delivery Riders Work?

Presentations: Washington Area Labor Economics Symposium (2026)

- Studied how gig delivery riders decide whether and how long to work when expected pay changes.
- Built an instrument from local restaurant mix and national order trends; applied it to 21M transactions.
- Found that a 1% pay increase raises hours worked by 2.5–2.8%; the response grows with experience.

Professional Experience

Navy Federal Credit Union

May – Aug 2026

Data Scientist (Model Risk Management)

- Decomposed the quarterly change in the credit card CECL forecast by account and driver (Python, SQL, R on Databricks); showed the net change masked offsetting movements roughly 10 times its size.
- Showed the existing one-driver-at-a-time attribution changed with the baseline because drivers interact; tested all baseline combinations, including Shapley values, and recommended a robust estimate.
- Screened all model inputs for material drivers and presented the findings to the MRM team.

Seoul National University

Sep 2018 – Aug 2019

Economic Consultant

- Analyzed the Hyundai–Daewoo merger of the world’s two largest shipbuilders with Compass Lexecon.
- Simulated post-merger production and costs, quantifying the efficiency gains from the merger.
- Found no expected price increase in defense contracts; submitted to the Korea Fair Trade Commission.

Teaching

- **Instructor:** Ph.D. Math Camp, GWU (Summers 2024, 2025); designed and taught the curriculum.
- **Teaching Assistant:** Ph.D. Econometrics I–II and Microeconomic Theory I–II, GWU (2023–2026).

Skills

- **Programming:** Python (pandas, scikit-learn, PyTorch), SQL, R, Stata; Databricks, AWS, GCP.
- **Causal inference:** A/B testing, DiD, IV, RDD, synthetic control, propensity score matching.
- **ML and NLP:** Logistic regression, Lasso, random forest, gradient boosting, neural networks, BERT.
